- **St. Teresa School Intermediate**   2022

  74.2%

- **Banasthali vidhyapith**   2025
  Bca
  7.79

Skills

- Python Machine learning in python Data analysis by excel, sql, power bi C++(DSA) Time Management Team work

---

Projects

- **Machine learning in python**
  . Start with gathering and understanding your dataset. Use libraries like Pandas for data manipulation and Matplotlib or Seaborn for data visualization.
  . Train your model using the training dataset and tune hyperparameters to improve performance.

- **Data analysis**
  . Gather all relevant data from various sources ensuring it's clean, accurate, and in a consistent format.
  . Apply statistical techniques and machine learning models to analyze the data.
